

FOR IMMEDIATE RELEASE

CombiScale Inc. Introduces the PrimoWeigher

August 17, 2009 (Chicago, IL) - The new PrimoWeigher by CombiScale is the next generation of combination weighing technology. It combines the speed and accuracy of previous weighers with serviceability and clean-ability never utilized before. Enjoy speeds of up to 120 cycles per minute and accuracy within less than 1 gram with reduced risk and downtime that only the Primo can offer.

The Primo's control panel is remotely mounted to allow the simplest servicing possible. Servicing a circuit board on conventional models takes about a one hour's time, the Primo takes less than 5 minutes. That's a 90% reduction in board replacement or troubleshooting.

The Primo's open frame construction and pivoting hopper allow for fewer areas of product accumulation and contamination making clean-up the easiest and most thorough available.

The PrimoWeigher is microprocessor operated, stores recipes in memory, and easily interfaces with any type of packaging machine. With the optional HD3 screen and Window XP™ platform the Primo is truly the

most user-friendly combination scale on the market today.

Features include: stainless steel construction, digital control logic and tool-less disassembly for quick cleaning. Individual lane chutes, Quick remove buckets, Quick remove pans, Adjustable and pivoting hopper.

CombiScale's PrimoWeigher available in 10 and 14 head configurations.
